

CREATE IBM WATSON IOT PLATFORM AND DEVICE

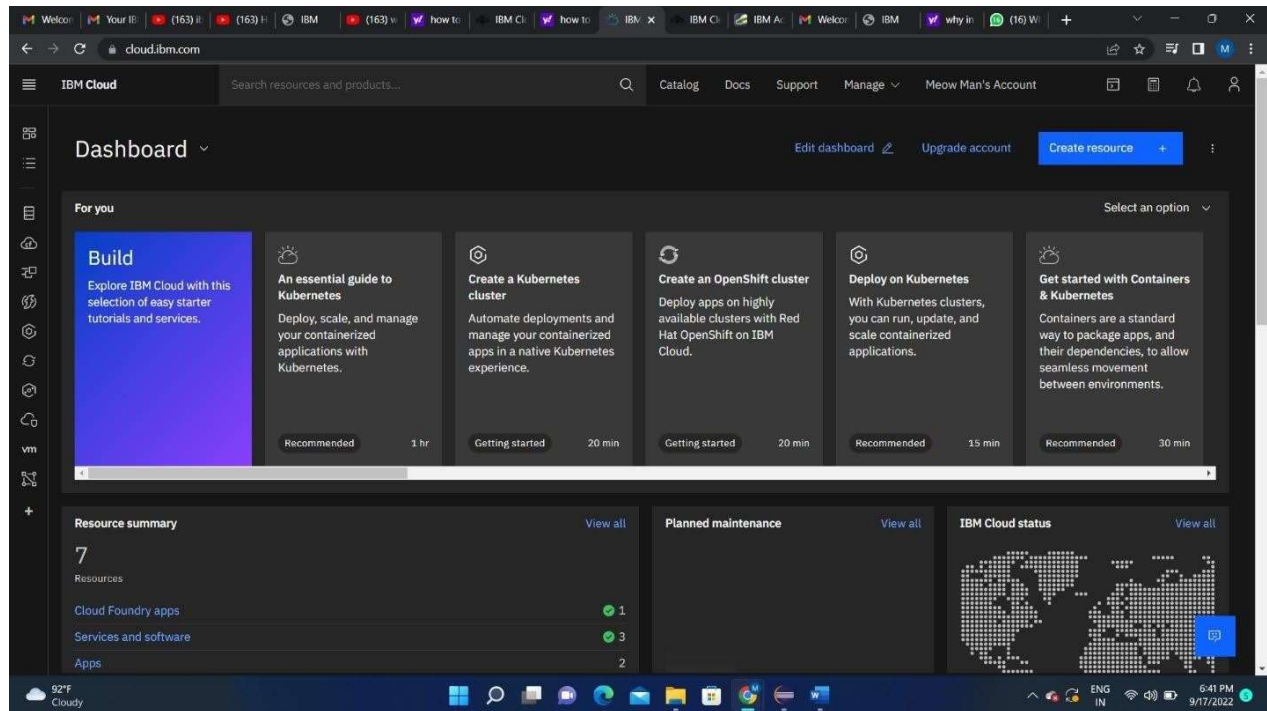

Date	08-10-2022
Team ID	PNT2022TMID29125
Project Name	Project - IOT based safety gadget for child safety monitoring and notification
Maximum Marks	4 Marks
Submitted By	Vasantha chandrakala.R

STEPS:

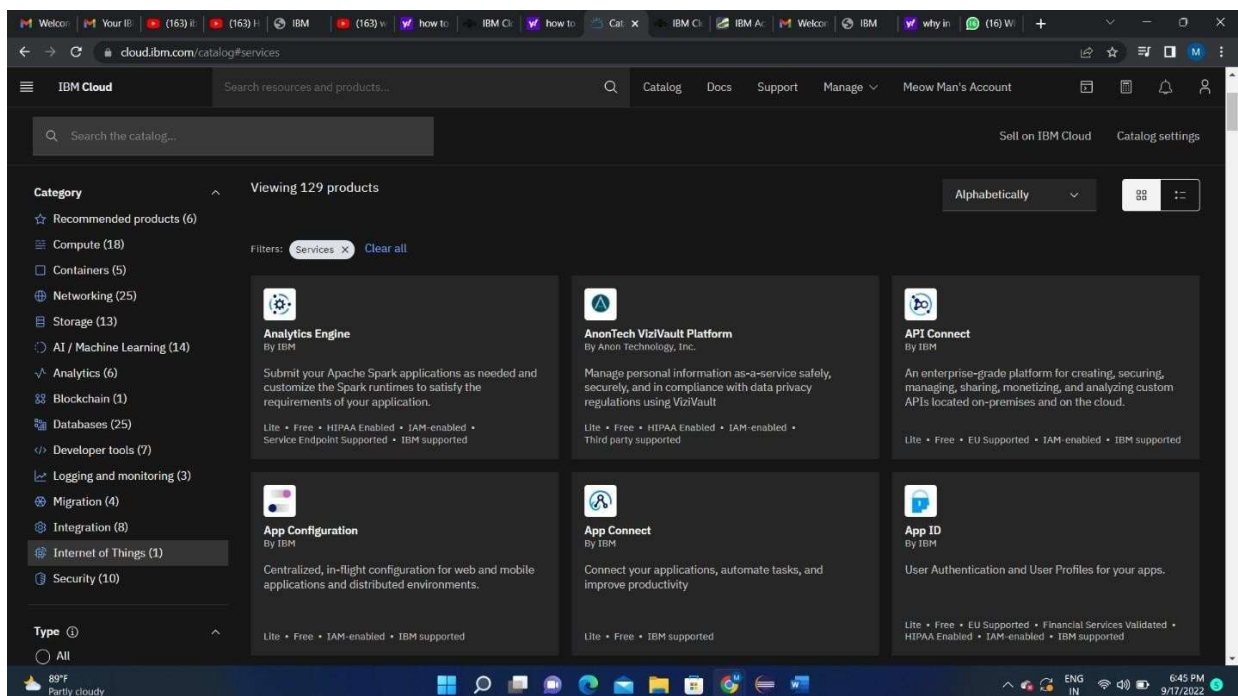

1. Firstly create an IBM cloud account with IBMid and password

2. Home page of IBM cloud

3. Click on the catalog on the top

Click on IoT in the category mentioned

The screenshot shows the IBM Cloud IoT Platform service page. The 'Create' tab is active, displaying a 'Select a location' dropdown menu with 'Dallas (us-south)' selected. Below this, a 'Select a pricing plan' section shows the 'Lite' plan as the only option, which is free. The plan includes up to 500 registered devices and a maximum of 200 MB of each data metric. A warning message on the right states: 'Existing Lite plan instance. You can have only 1 Lite plan instance of this service per resource group. Delete your current Lite plan instance in Default resource group to create a new one, or view the existing instance.' The 'Create' button is disabled.

Plan	Features	Pricing
Lite	Includes up to 500 registered devices, and a maximum of 200 MB of each data metric. Maximum of 500 registered devices Maximum of 500 application bindings Maximum of 200 MB of each of data exchanged, data analyzed and edge data analyzed	Free

4. If already a lite is present delete it else u can't create another

The screenshot shows the IBM Cloud IoT Platform service page with the 'Configure your resource' tab active. The 'Service name' field is set to 'Internet of Things Platform-bb'. The 'Select a resource group' dropdown menu is set to 'Default'. The 'Tags' field is set to 'Examples: env:dev, version:1'. The 'Access management tags' field is set to 'Examples: access:dev, proj:version:1'. The 'Create' button is disabled.

Plan	Features	Pricing
Lite	Includes up to 500 registered devices, and a maximum of 200 MB of each data metric. Maximum of 500 registered devices Maximum of 500 application bindings Maximum of 200 MB of each of data exchanged, data analyzed and edge data analyzed	Free

5. Enter the location and in the configure your resource type the service name and choose the plan, tick the agree with agreements and then click on create

6. Internet of Things Platform Child_safety will be created, where there are different options like manage, plan, and connection (manage is for launch, Plan gives us the idea about the payment package and its upgrades, and lastly the connection is for to connect IoT with other servies)

The screenshot shows the IBM Cloud IoT Platform console. The left sidebar has a 'Manage' tab selected. The main content area displays a 'Let's get started with IBM Watson IoT Platform' section with a 'Launch' button. Below this, there's a 'Ready for the next level?' section titled 'IBM Watson IoT Platform Journey' with three options: 'Lite', 'Non-Production', and 'Production'. The 'Lite' option is highlighted.

Let's get started with IBM Watson IoT Platform

Securely connect, control, and manage devices. Quickly build IoT applications that analyze data from the physical world.

Ready for the next level?

IBM Watson IoT Platform Journey

- Lite**
The Lite service plan provides a lightweight development environment to get you started with the connectivity capabilities of Watson IoT Platform.
• Free
- Non-Production**
The Non-Production service plan is a full-featured, fully-integrated offering that enables you to explore Watson IoT Platform to see how the service can fit into your IoT environment.
• Starts at \$500 per month
- Production**
The Production service is a fully managed SaaS offering that enables you to manage and analyze enterprise IoT data.
• Includes IBM Service & Support

The screenshot shows the IBM Cloud IoT Platform console with the 'Plan' tab selected. The main content area displays the 'Current plan' as 'Lite' with its features. To the right, the 'Current usage' is shown as 'N/A'. Below this, there's a 'Change pricing plan' section with a table showing the 'Lite' plan details.

Lite plan services are deleted after 30 days of inactivity.

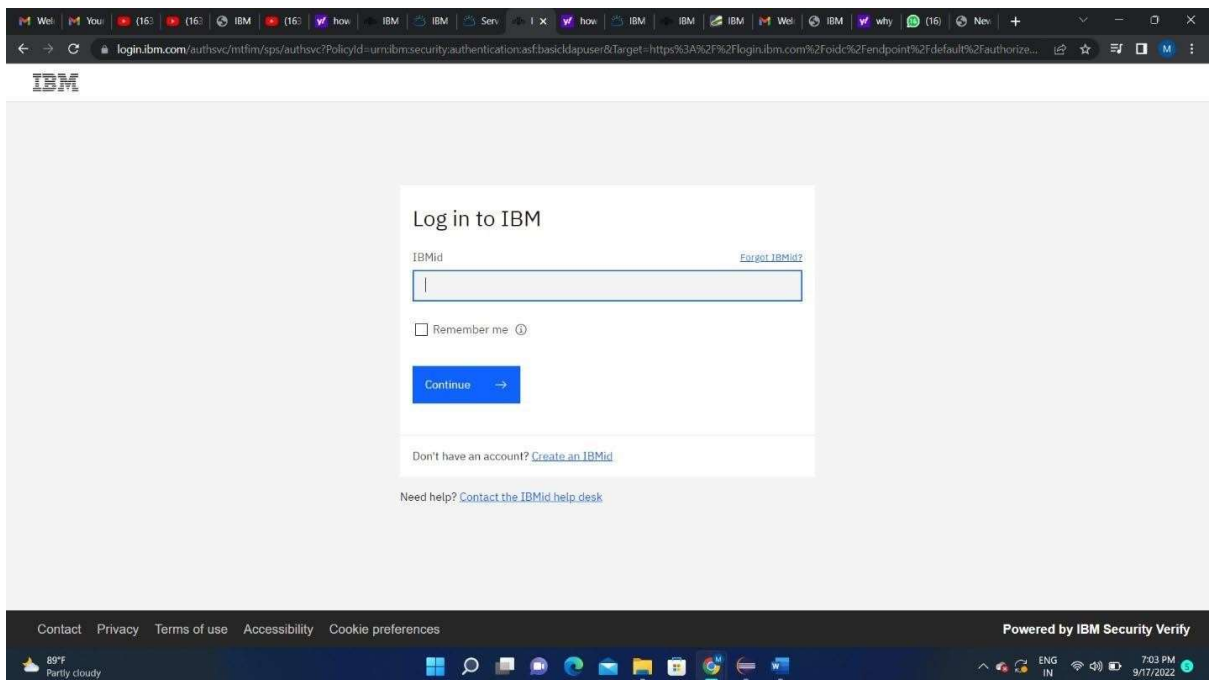

Change pricing plan

Plan	Features	Pricing
Lite	Includes up to 500 registered devices, and a maximum of 200 MB of each data metric Maximum of 500 registered devices Maximum of 500 application bindings Maximum of 200 MB of each of data exchanged, data analyzed and edge data analyzed	Free

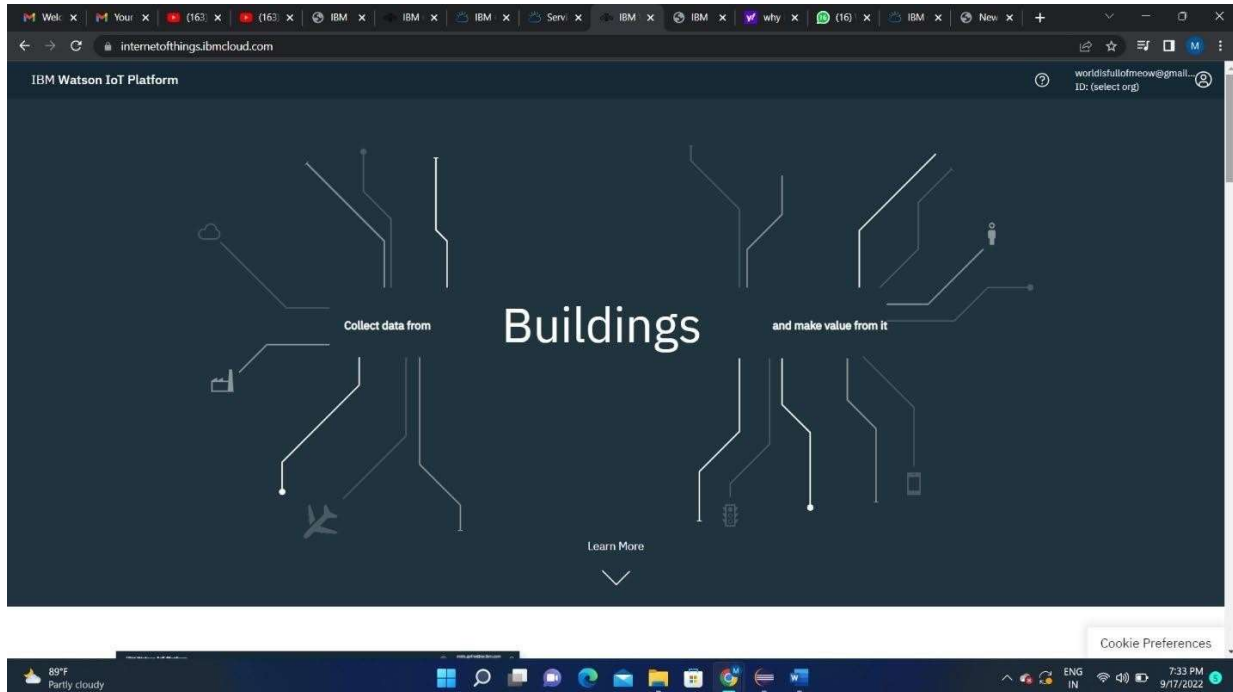

7. Clicking on the launch button in the manage tab, it will open to this

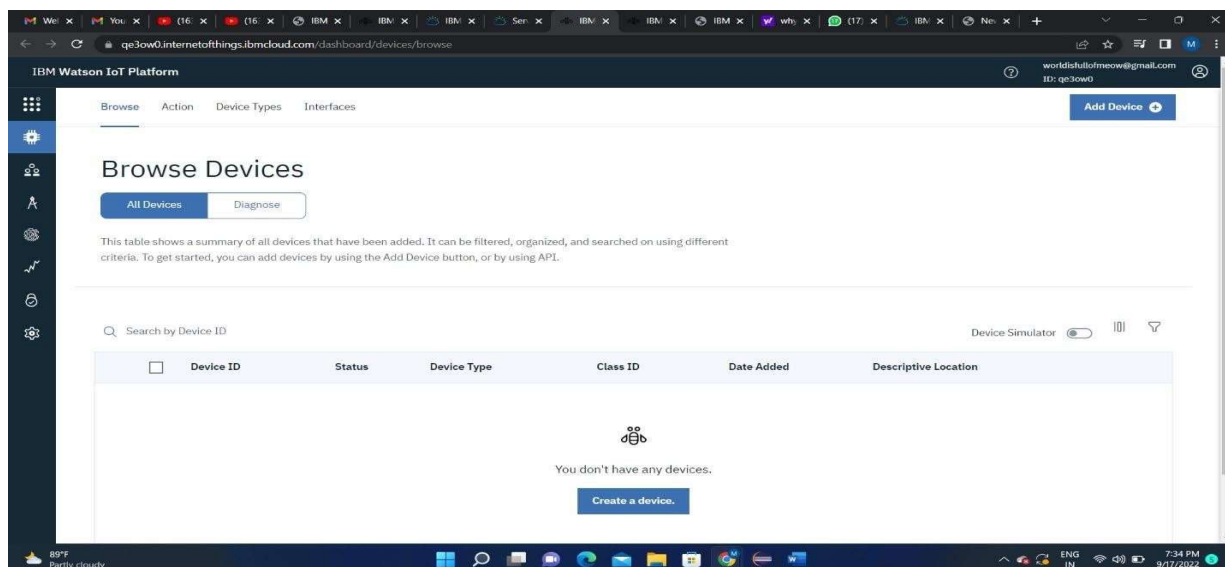

8. Enter the details to sign in to the Watson Cloud to create a device

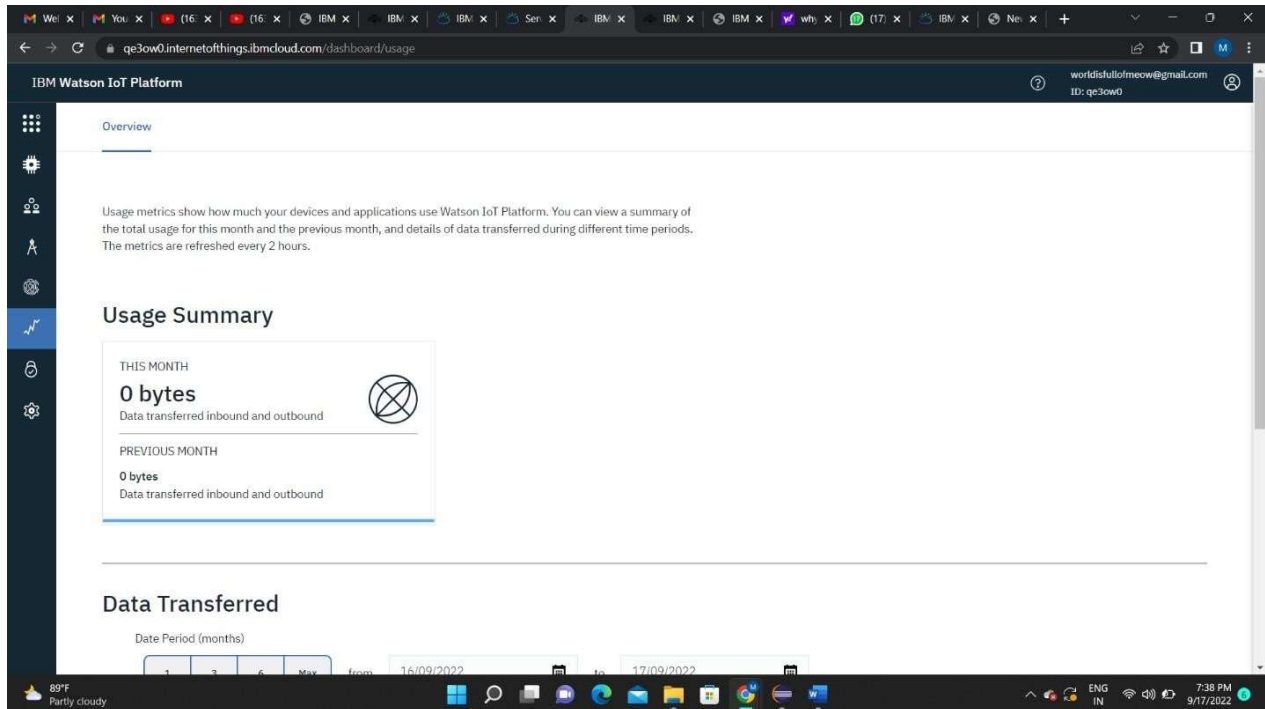

9. Once logged in the name will be displayed and it goes back to the firstpage

10. And again clicking on the launch button will open this tab, the device will help in the creation of the devices, the addition of devices, and the display of details of the devices

11. Usage gives the summary of how many bytes are used between the devices and the IBM cloud.

12. The member tab is add the teams members to work in the platform

The screenshot shows the IBM Watson IoT Platform dashboard for the "Browse Members" section. The top navigation bar includes the IBM logo and the user's email address, worldisfullofmeow@gmail.com, with the ID: qe3ow0. The left sidebar contains various icons for navigation. The main content area is titled "Browse Members" and includes a search bar with the placeholder text "Type the member email to search for". Below the search bar, there is a table showing a summary of the members of the organization. The table has columns for "Email Address", "Name", "Role", "Added By", and "Expires". There is one result listed: "worldisfullofmeow@gmail.com" with the role of "Administrator". The bottom of the screen shows a Windows taskbar with the date 9/17/2022 and time 7:38 PM.

13. This tab is used when you want to connect to some other platform and to integrate with other services.

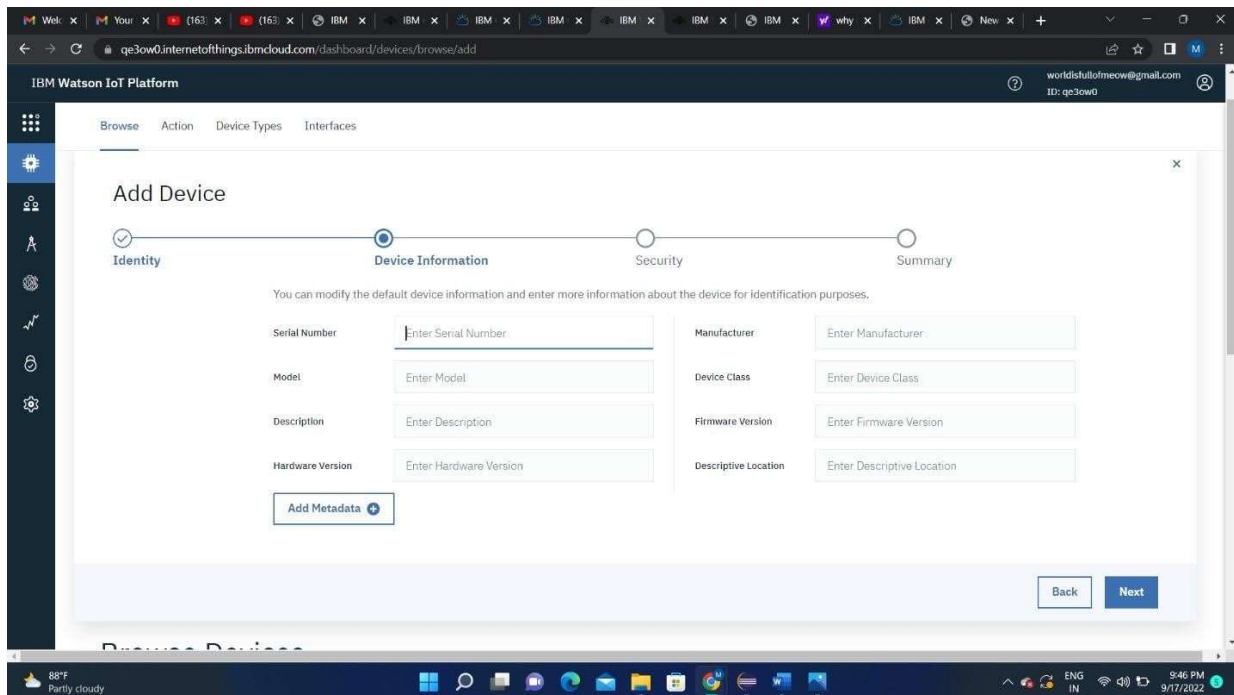

14. Click on the device tab and click on the add device button, then give the device type and device id and click next

15. This page to enter extra details and of the hardware

16. Clicking next it goes to the security where we do authentication token id.

The screenshot shows the 'Add Device' wizard in the IBM Watson IoT Platform. The 'Security' step is active, showing two options for authentication: 'Auto-generated authentication token (default)' and 'Self-provided authentication token'. The 'Auto-generated' option is selected, and a text box displays the generated token: '1997199520012005'. Below the token, a note states: 'Make a note of the generated token. Lost authentication tokens cannot be recovered. Tokens are encrypted before being stored.' and 'Authentication token are encrypted before we store them.'

IBM Watson IoT Platform

ID: qe3ow0

Browse Action Device Types Interfaces

Add Device

Identity Device Information Security Summary

There are two options for selecting a device authentication token.

Auto-generated authentication token (default)

Allow the service to generate an authentication token for you. Tokens are 18 characters and contain a mix of alphanumeric characters and symbols. The token is returned to you at the end of the device registration process.

Authentication Token: 1997199520012005

Make a note of the generated token. Lost authentication tokens cannot be recovered. Tokens are encrypted before being stored.

Authentication token are encrypted before we store them.

Self-provided authentication token

Provide your own authentication token for this device. The token must be between 8 and 36 characters and contain a mix of lowercase and uppercase letters, numbers, and symbols, which can include hyphens, underscores, and periods. Do not use repeated characters, dictionary words, user names, or other predefined sequences.

17. Clicking on next it goes to the summary of the device then click finish

The screenshot shows the 'Add Device' wizard in the IBM Watson IoT Platform, now at the 'Summary' step. It displays the information entered in the previous steps: 'Device Type: NodeMCU', 'Device ID: 199795', and 'Security Token: 1997199520012005'. A 'View Metadata' button is located below the device ID. At the bottom right, there are 'Back' and 'Finish' buttons.

Add Device

Identity Device Information Security Summary

Verify that the following information is correct then select Finish

Device Type: NodeMCU

Device ID: 199795

View Metadata

Security Token: 1997199520012005

Back Finish

18. The device credentials will be displayed with all the details

The screenshot shows the IBM Watson IoT Platform interface. The left sidebar contains navigation icons. The main content area is titled 'Device Drilldown - 199795'. Under the 'Device Credentials' tab, a table displays the following information:

Organization ID	Device Type	Device ID	Authentication Method	Authentication Token
qe3ow0	NodeMCU	199795	use-token-auth	1997199520012005

Below the table, a warning message states: 'Authentication tokens are non-recoverable. If you misplace this token, you will need to re-register the device to generate a new authentication token.' A link is provided to 'Find out how to add these credentials to your device'.

19. Save the details of the device as the authentication tokens are non-recoverable and if misplaced then we have to create a new one.

The screenshot shows the same IBM Watson IoT Platform interface as in the previous image. A Notepad window titled 'ibmdet - Notepad' is open on the right, displaying the following text:

```
Organization ID qe3ow0
Device Type NodeMCU
Device ID 199795
Authentication Method use-token-auth
Authentication Token 1997199520012005
```

The Notepad window is positioned over the 'Device Credentials' section of the IBM Watson IoT Platform page, indicating that the credentials are being saved for future use.

20. Clicking on the device tab we can now see the added device. Clicking on it will display the other details.

It has different tabs like Identity, Device Information, State and login.

The screenshot shows the IBM Watson IoT Platform interface. The top navigation bar includes 'Browse', 'Action', 'Device Types', and 'Interfaces'. A search bar labeled 'Search by Device ID' is present. A table lists devices with columns: Device ID, Status, Device Type, Class ID, Date Added, and Descriptive Location. One device is listed: Device ID 199795, Status Disconnected, Device Type Nodemcu, Class ID Device, Date Added 17 Sep 2022 20:07. Below the table, a modal window is open for the selected device, showing tabs for Identity, Device Information, Recent Events, State, and Logs. The 'Recent Events' tab is active, displaying a message: 'The recent events listed show the live stream of data that is coming and going from this device.' Below this message is a table with columns: Event, Value, Format, and Last Received. The bottom of the screen shows a Windows taskbar with the date 8:11 PM 9/17/2022.

The screenshot shows the IBM Watson IoT Platform interface, similar to the previous one, but with the 'Device Information' tab selected in the modal window. The modal displays the following details for the device with ID 199795:

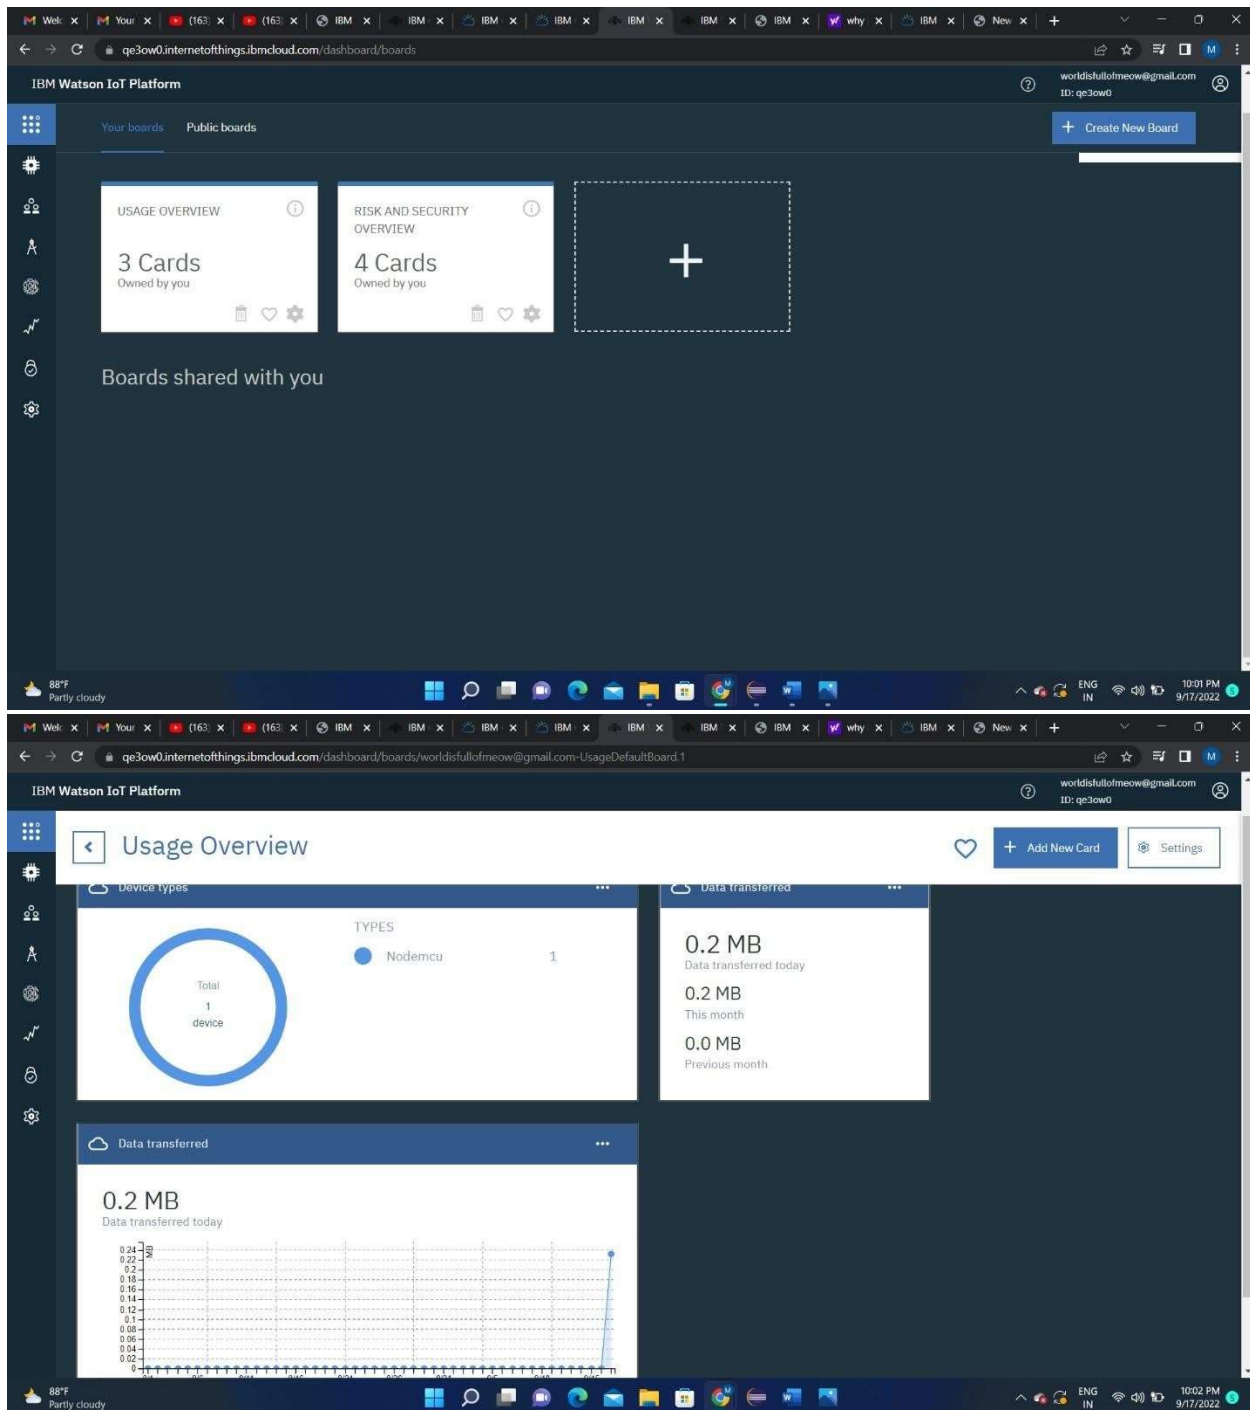

Device ID	199795
Device Type	Nodemcu
Date Added	17 Sep 2022 20:07
Added By	worldisfullofmeow@gmail.com
Connection Status	Disconnected

At the bottom of the modal, it shows 'Items per page: 50' and '1-1 of 1 item'. The bottom of the screen shows a Windows taskbar with the date 8:10 PM 9/17/2022.

In a similar way, we can create n number of devices with a 50 per page limit as

per the requirement of our project.

21. The Boards will display card for the project.

RESULT:

An IBM Watson cloud for IoT and a device is created
